

## Secure, Accurate and Reliable

The **Cash Exchange Machine (CEM)** forms an integral part of an alternative delivery channel within Self-Service. Providing a convenient and flexible solution, it allows for the exchange of high denomination banknotes into low denomination banknotes as well as rolled and loose coin.

Offering a Self-Service change solution for both notes and coins, the CEM releases staff from time consuming and costly cash handling duties and provides a full cash exchange facility for the banking, transport and retail sectors.

Two versions of CEM are available, the 6-silo 4330 model and the larger-capacity, 8-silo 4380. Both offer identical functionality and maintain the same modular approach to future upgrades and connectivity.

### Benefits of Cash Exchange Machine

- Simple and quick replenishment procedure for bank staff or CIT personnel
- Compact design takes up minimal valuable floor space
- Reliable technology ensures excellent availability and a low total cost of ownership
- Fast, efficient exchange process and simple user interface

Up to 8 rolled coin silos

## Cash Exchange Machine (CEM)

### Capacity

The CEM can dispense up to 8 denominations of rolled coin in a single transaction, along with the option of banknotes and loose coin.

### Capacity per silo
